## From the *Editor-in-Chief*

Mycotaxon 111—The 536-page January–March volume presents 91 new fungal names and 65 papers by 206 authors and co-authors representing 35 countries and assisted by 115 expert reviewers. Submissions continue at last year's high, with 48 new manuscripts accessioned during 2010 as of today. After closure of this volume, we already have 43 final submissions tentatively scheduled for publication in the April—June volume.

Book reviews now online—Those interested in purchasing recent mycological books may now access recent Mycotaxon book reviews from our website free of charge. You may download our most recent set of reviews (Hawksworth (ed.) 2009, Mycotaxon 110: 507–562) from <www.mycotaxon.com/vol/110.html> by clicking on the PDF link in the table of contents for the October–December volume.

Those interested in obtaining or writing book reviews are invited to contact *Book Review Editor* Else Vellinga at <bookreviews@mycotaxon.com>.

Nomenclature—We invite anyone wishing to comment on a nomenclatural proposal now under consideration by the IAPT Permanent Nomenclature Committee for Fungi to submit short opinion papers for publication in Mycotaxon's new Nomenclature Section (pp. 501–520, this volume). Such opinions will also be shared with the Committee for Fungi, which sends its final recommendations to the General Committee for a final decision by the Nomenclature Section at the International Botanical Congress in Melbourne in 2011.

Mycotaxon bids adieu to French-language manuscripts— Since 'founding fathers' Grégoire Hennebert (Belgium) and Dick Korf (USA) established our journal in 1974, we have offered authors the opportunity to publish in English or French. Lately, however, very few French papers have been submitted, with only four French manuscripts having been received by me since October 2003. After considerable discussion in November, the *Editorial Advisory Board* recommended that Mycotaxon change its policy and henceforth accept only English language submissions. Varying degrees of regret were expressed at the change, but the majority view was that English is "now (for better or worse) the major language of scientific discourse [and] that there is no longer any particular reason why Mycotaxon should make an exception for Francophone authors that is not extended to speakers of any other non-English language."

The Editors agree (somewhat reluctantly) with the Board, making Serge Audet's thoughtful 36-page study of *Scutiger* sensu lato (this volume, pp. 431–464) the final French-language paper to be published by Mycotaxon. We thank former and current *French Language Editors* Grégoire Hennebert and Cony Decock for their editorial contributions to the first 110 Mycotaxon volumes.

Warm regards,

Lorelei Norvell,
Mycotaxon *Editor-in-Chief*

## Four easy steps to successful Mycotaxon publication

Mycotaxon's complete instructions, which were last updated in November, 2007, are posted on the Instructions to Authors page on the Mycotaxon website listed below. Prospective authors should download instructions PDF, expert reviewer comment and submission forms, and helpful templates by clicking the 'file download page' link on the instructions page before preparing a paper intending for the journal. Below is a summary of our simple '4-step' publication process.

Step 1—Peer review: Authors send a formatted text document with illustration files and Mycotaxon Reviewer Comments Form to two experts for peer review. Authors should (i) make certain that both peer reviewers have Emailed the comment forms to the *Editor-in-Chief* <editor@mycotaxon.com> and (ii) revise their manuscript according to reviewer suggestions **before** submitting a master text file to the *Nomenclature Editor* for nomenclatural review.

Step 2—Nomenclatural review: Authors next Email their revised master text file (containing footnotes, tables and captions but ***NO*** illustrations) to the *Nomenclature Editor* <PennycookS@LandcareResearch.co.nz> for accession and pre-submission review. The Email message *MUST* include the word 'Mycotaxon' on the subject line and *MUST* include names **and** Email addresses of all peer reviewers. The Nomenclature Editor will return annotated files with a list of needed corrections to the authors and *Editor-in-Chief.*

Step 3—Final submission: After authors receive their manuscript accession number and make revisions requested during nomenclatural review, they should send (i) a completed Mycotaxon submission form; (ii) separate text files for main text, tables, and legends; and (iii) art files to the *Editor-in-Chief* <editor@mycotaxon.com>. **Only** text and image files considered ready for immediate publication should be sent at this time. The *Editor-in-Chief* will try to acknowledge receipt of files within two weeks. Authors are asked to wait at least 14 days before sending a follow-up query, to avoid unnecessary Email traffic near publication deadlines or during temporary closures of the editorial office.

Step 4—Press preparation: After preparing a press-quality PDF from the author's text and art files, the *Editor-in-Chief* sends journal entries for the nomenclatural novelties and author index pages with the PDF proof to all coauthors for approval. Editorial errors are always corrected free of charge, but authors who ask the *Editor-in-Chief* to correct errors present in their original files will be charged $10 per correction (minimum charge of $40). Payment arrangements of all fees should be made by writing the *Business Manager* <subscriptions@mycotaxon.com>.

Mycotaxon frequently updates its webpages and regularly posts abstracts, table of contents, indices, distributional checklists, and revised instructions and forms on its website. We invite all of you to browse our website frequently for updated journal and other interesting mycological news.
